Instructions: How to send your Clarity data with DIABASS SecureSend

These instructions describe how to send data from Dexcom Clarity to your doctor or clinic using DIABASS SecureSend. It is easy and does not take too much time:

First, you need to export your data from the Clarity Cloud. In a second step, you can send your data highly securely via DIABASS SecureSend to your diabetes team.

Export data from Dexcom Clarity

Step 1 Log into your Clarity account and choose menu EXPORT

Step 2

The select the timerange you want to export.

A raw data file in CSV format will now be generated. Please save this file in a folder on your hard disk.

Send data to your doctor/clinic

For sending data to your diabetes team, you can either use the diabetes diary software **DIABASS6** or the **DIABASS SecureSend Uploader**. DIABASS6 offers numerous evaluations and allows convenient documentation of all relevant diabetes data, for example medication, insulin and nutrition.

Both software are free of charge, please follow the instructions on the info sheet you received from your practice/clinic.

Step 1

If you are using DIABASS6:

Double-click on the CSV file downloaded as above.

A dialog appears and you can select how to open this file.

Select DIABASS IMPORT.

The data will then be automatically transferred to your diary.

			Muster DE-12365 http://www.	rpraxis atr. 12345 Musterstadt Giebass.com		
	Please select the way to send the data Send with your standard mail program (Thunderbird) An email is created in Thunderbird, which you can then send manually. Anonymously via the DIABASS server The encrypted data is transmitted to the DIABASS server and from there it will be sent to the recipient by email. Your email address remains anonymous.					
Cancel				Previo	NIR.	Next

Sending with you standard mail program:

After clicking on **NEXT**, an e-mail is generated in your standard email client.

Note: you need to send this e-mail manually.

This option is only available if the e-mail client allows the hand-over of file attachments.

Anonymously via the DIABASS server:

After CLICKING on **NEXT**, you will first be asked again for your consent to the data transfer. If you agree, the encrypted data will be transmitted to the *DIABASS SecureSend* server. From there, your values will be forwarded to the recipient by e-mail, using a neutral sender address. As soon as completed, the data will be deleted from the *DIABASS SecureSend* server.
