Step 1
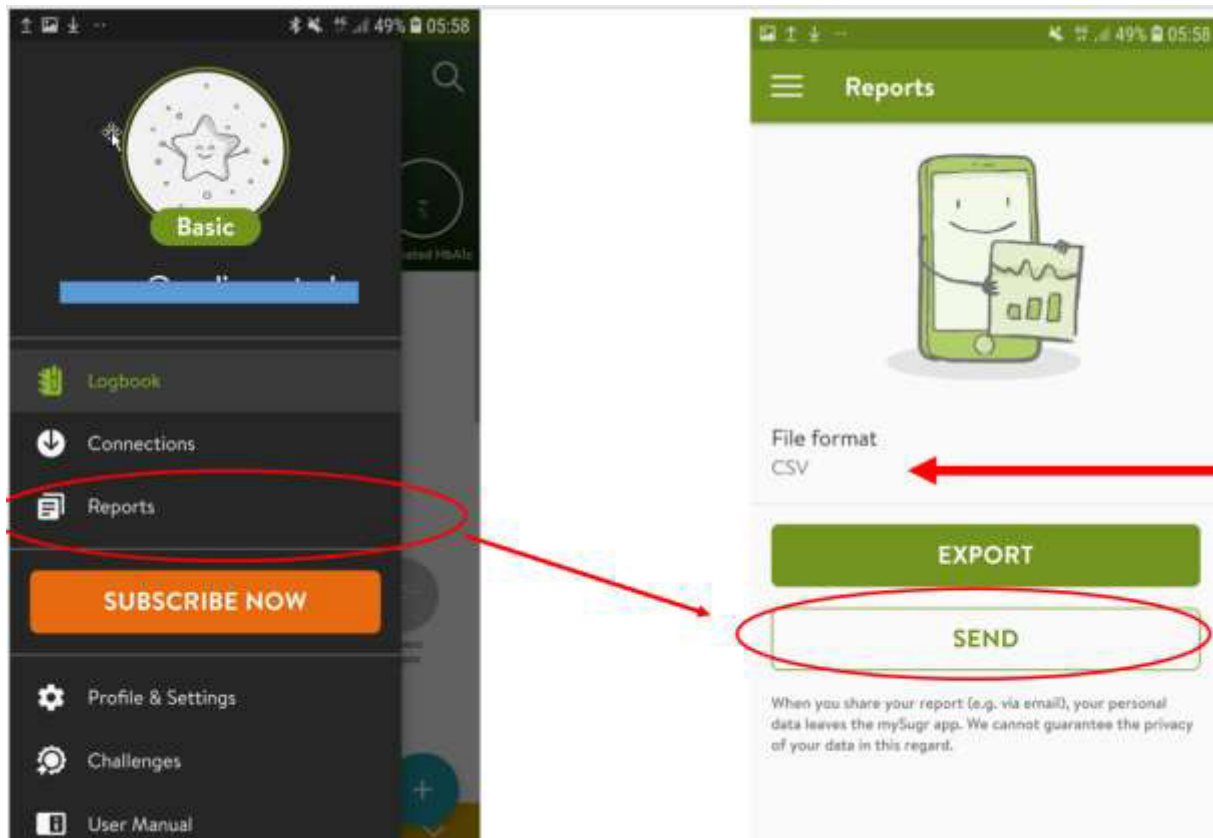

Open mySugr App and choose menu **REPORTS**, select **FILE FORMAT „CSV"**

Then click on **SEND**

Step 2

In the appearing list, please choose the **DIABASS SecureSend** app**.**

Step 3

The *DIABASS SecureSend* App will now start automatically and display the file to be sent.

Please confirm with click on **NEXT**

Step 4

Click **SCAN BARCODE** and scan the barcode from the info sheet you received from your practice.

The recipient's information will be displayed.

Please confirm with click on **NEXT**

Step 5

In the next step, you can enter an (optional) message for the recipient.

Please click on **NEXT** to proceed.

Step 6

After some instants, the data are now highly securely
encrypted (AES-256) and ready for transmission.

You can now choose how to send the data.

Sending via Email App:

An email message is generated in your default email app.
You need to send this E-Mail manually from this email app.

Sending via Server:

The encrypted data will be posted to the *DIABASS SecureSend*
server. From there, the data will be forwarded to the recipient
via email, using a neutral sender adress.
As soon as completed, the data will be deleted from *DIABASS*
SecureSend server.

Please click on **NEXT** to proceed.
